

Telefunken RG48 rectifier

This valve measures 205x50mm overall and has a 4 pin base.

Filament voltage	5V
Filament current	7A
Max PIV	7.5kV
Max anode current	600mA

The markings on the glass are:

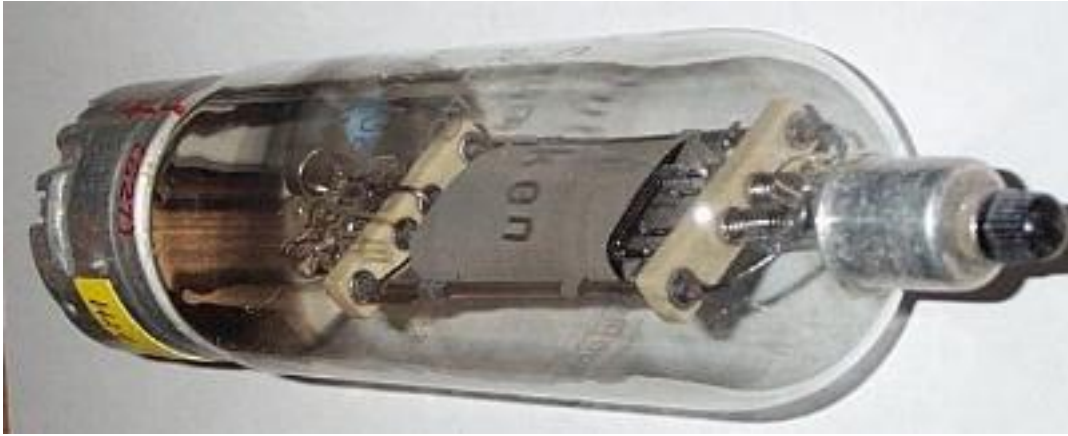

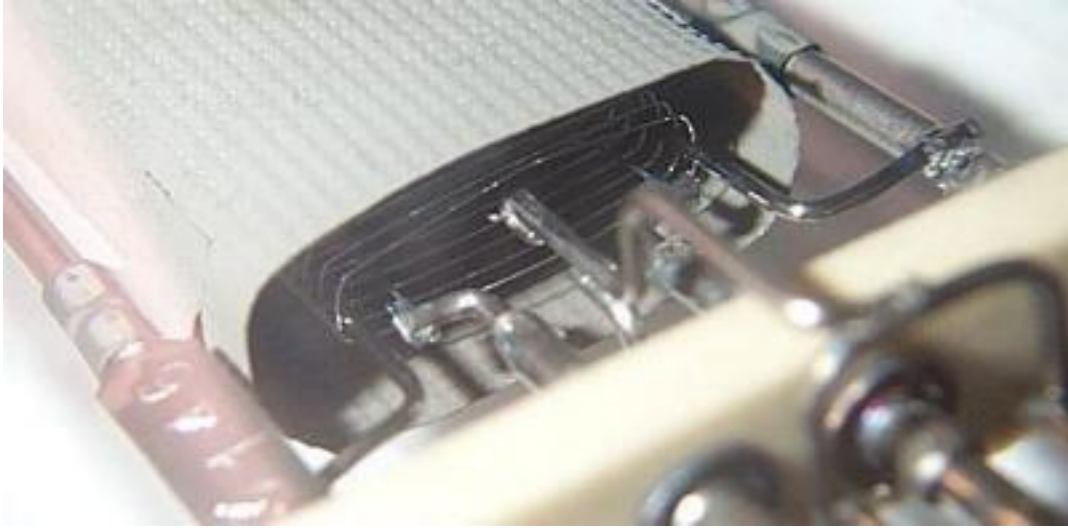

Kriegsmarine 2868

Telefunken RG48 Nr. 101470/0840/III 5.0V

A/B Mob S 700 (627) is marked around the base.

The valve construction is somewhat odd as it has what appears to be a grid, except this is connected to the anode.

Thanks to Roy Johnson for information on this valve.
